

I OPPOSE the passing of HR4026 and ask the FCC to reject NAB's petition 04-160. I am an XM Satellite radio subscriber and I find the the coverage of local as well as national and world-wide news and events to be more complete and clearer than any local AM or FM radio station(s). If they want me to listen to their station they they better provide a better and more complete service. XM service is a service that I am willing to pay for and they are providing me with the service and kind of information that I want. DO NOT TAKE THAT OPTION AWAY FROM ME. I most recently have become an avid listener of the local weather and traffic stations provided via XM radio and they have been invaluable in my travels up and down the northeast coast from Maine to Washington. I therefore urge you to do all in your respective power to see to it that NAB's petition 04-160 is rejected and HR4026 is defeated if it gets that far.
